- » SET WASH RESISTANCE EXPECTATIONS- HOME V. INDUSTRIAL DRYERS EXAMPLE (NEEDS TO BE EDITED AS NEEDED. TRANSLATED INTO FRENCH AND CARE SYMBOLS ADDED)

The patches on this jersey have been applied with a permanent adhesive. If the following care instructions are followed, the patches should remain on the jersey for up to \_\_\_\_\_ washes.

- » DO NOT DRY CLEAN DO NOT WASH IN HOT WATER
- » DO NOT USE CHLORINE BLEACH
- » DO NOT USE FABRIC SOFTENER
- » WASH WITH LIKE COLORS
- » DO NOT OVERLOAD THE WASHING MACHINE
- » DO NOT MACHINE DRY ON HIGH HEAT
- » DO NOT LEAVE WET OR DAMP GARMENTS IN YOUR TRAVEL BAG, IN A PILE WITH OTHER CLOTHING, OR IN WASHING MACHINE

It is always advisable to test wash a single uniform according to directions before washing an entire load.

We recommend presoaking heavily soiled garments in cold water with a protein release agent. Follow the instructions recommended by the presoak manufacturer.

Wash garments immediately following the presoak in a normal wash cycle. "Wash and rinse all garments in cold water with mild detergent. Remove promptly after wash cycle to avoid color migration.

For optimum results, hang garments (especially those with spandex) to dry. If you cannot hang dry, machine dry on the lowest setting. Turn jerseys inside out before machine drying. Remove items from dryer immediately upon completion of the cycle. (Excessive heat can cause fabric shrinkage, discoloration, and cracking and peeling of vinyl plastisol lettering inks.)

Make sure uniforms are completely dry before storing. Store uniform in a dry area to prevent mildew. Protect them from sunlight and fluorescent light to prevent yellowing.
