TOWNSHIP
OF WILMOT

In response to new provincial restrictions under Ontario's COVID-19 Response Framework and recommendations from the Region of Waterloo, some Township programs and services have been adjusted or cancelled to help stop the spread of COVID-19.

In order to help keep our community safe, the Township of Wilmot is introducing a new pre-screening tool that all individuals entering our facility will be required to complete. This screening must be submitted on the day of entry into a recreation facility. If you are currently screening with your minor sport organization please continue this practice unless you are informed otherwise.

You can find the screening questionnaire at www.wilmot.ca/covidscreening. In the event that you fill out the tool prior to your visit, please print or take a screen shot which **MUST** match the date of your program to enter the facility. In the event that your paper/screenshot does not match or you have not completed it ahead of time, will result in being screened at the door with a Township screener. A QR code is also available at the doors for you to use the screening tool with your own device. Staff will be available at the Wilmot Recreation Complex to ensure that all individuals (including parent/guardian) have completed the screening.
